DOCKET CONTROL

Arizona Corporation Commission
DOCKETED

MAY 08 2012

DOCKETED BY
Jm.

Dear Elected Officials et al.:

Please take the time to review this information so that you are informed regarding "smart meters" and the "smart grid's" extreme vulnerability just to security risks alone, never mind the compelling research studies showing its lethal results to all life forms.

As no moratorium in AZ has been issued by our Arizona Corporation Commission, I need to remind all elected officials that they are responsible for protecting human life and as such, they need to fully inform themselves of the "unintended consequences" of any "smart" gadget. You will be held accountable for approving this horrific technology, or disapproving which, or course, is the wisest action to take.

Finally, think about your family members' and their lives' and how you would feel knowing that by approving "smart meters" you are condemning them to painful and shortened lives, and if that is not reason enough, think about your own longevity.

Nancy Baer, APS Consumer
Sedona, AZ

04/22/12: Dr. David Chalk/cyber technology expert, 30 years computer experience; issues public warning on the serious flaws in this Wireless Smart Grid system "which is anything but smart". The Greatest Crisis of Mankind / a hacker's paradise which could bring an end to all human life as we know it.

The Question is: "Why are the details of all these world-wide documented health hazards & total loss of privacy in your own home; not being properly presented to the public in most of main stream media. "Alarm bells should be ringing on that topic alone". This is obviously much more than a power management system which is now being forced upon innocent victims who have not been told the truth of the situation.

<https://www.securityweek.com/smart-power-grids-prime-target-cyber-warfare>

Richard Clarke: Clarke was National Coordinator for Security, Infrastructure Protection, and Counterterrorism during the Clinton years and also served in the Reagan and two Bush administrations.

Governments and utilities involved in building the United States' "smart" power grids of the future are also constructing some of the most attractive targets imaginable for potential adversaries in a cyber warfare scenario. In the recently-released *Cyber War: The Next Threat to National Security and What to Do About It*, by Richard Clark and Robert Knake, the power grids

are identified as one of the three most important and vulnerable U.S. targets, the other two being the defense department's IT infrastructure and private telecommunications backbone networks.

RE: e-Docket Number: E-OOOOOC-11-0328

Hello,

We're imploring you to consider the serious health effects that Smart Meters are having on Arizona citizens. Since having the Smart Meters installed in our neighborhood in January 2012, both my husband and I have experienced a severe decline in our health. The symptoms that we experience are too long to list.

Please ban the Smart Meters from Arizona...and remove the ones that have been installed.

Sincerely,

A & B

Antonio Gill

Dear Commissioner Pierce

I am e-mailing you to ask you to ban the smart meters from the state of Arizona due to the health problems they cause. Among these are headaches, insomnia, heart problems, flulike symptoms all well-documented.

Additionally, they are an invasion of our privacy and can be used to discover when someone is home and when they are not by those who have burglary intents.

I'm not sure that anything additional is to be gained from all the data that is gathered by these devices.

I'm grateful for your help and consideration here, Commissioner Pierce.

Steve
